

BG724//Felt Accessory Bag

Fabric Composition:
100% Polyester Felt

**Recommended area size for
decoration (WxH in CM):**

Showcased decoration method – Embroidery (Barudan BEV Series used in this example)

1. Unzip the pouch and hoop up the desired side (12cm hoop recommended for large size) and attach to the embroidery machine
2. Have the desired logo digitised and loaded into your machine via USB/scanner (please note the digitiser should be made aware of the product in question with measurements, so the design works around the straps if needed)
3. Trace the design checking that the needle does not touch the hoop or straps
4. Start the embroidery
5. Remove the hoop and trim any excess thread if needed

**Personalisation and decoration can be applied in many areas. The above illustrates the easiest recommended area on this product.*

Other recommended decoration methods:

1. Transfer Print

- Temperature on heat press set at 145 degrees, high pressure, timer at 25 seconds
- Cover surface with a polyester fleece sheet on both presses
- Unzip the pouch and slip it onto one of the corners of the platen. Then insert a small Teflon cushion to raise the print area away from zips
- Pre-press the surface for 5 seconds
- Tested on Adkins swing head heat press, with '123 Premium' vinyl from TheMagicTouch

2. Applique

- Heat applied patches sold by third parties like Etsy can be easily attached with a heat press
- Cover surface with a Teflon sheet
- Pinbadges can be easily attached to the pouch to compliment the style
